

Snowboard Prep Routine (Mobile-Friendly)

Daily 25–30 minute routine designed to reduce soreness and injury risk, with special focus on hips, knees, ankles, and single-leg strength.

1. Warm-up (5 minutes)

- March in place or jumping jacks – 1 minute
- Hip circles – 10 each direction
- Ankle circles – 10 each direction per foot
- Torso rotations – 20 reps

2. Mobility & Stretching (10 minutes)

- World's Greatest Stretch – 5 reps each side
- Figure-4 stretch – 30 seconds each side
- Hamstring hip-hinge stretch – 30 seconds each side
- Calf stretch (straight and bent knee) – 30 seconds each position per side
- Ankle dorsiflexion stretch – 10 slow reps each side
- Cat–Cow – 10 slow reps

3. Strength & Stability (10–12 minutes)

- Single-leg balance – 30–45 seconds each side
- Single-leg Romanian deadlift (bodyweight) – 8 reps each side
- Split squats – 8 reps each side
- Glute bridges – 12 reps
- Dead bug – 6–8 slow reps each side
- Side plank – 20–30 seconds each side

4. Optional Recovery (3 minutes)

- Deep squat hold – 30–60 seconds
- Gentle spinal twist – 30 seconds each side

Weekly Structure

- Daily: Warm-up + mobility
- Days 1, 3, 5: Full strength routine
- Days 2, 4, 6: Reduced strength (balance, split squats, core)
- Day 7: Mobility only

Extra Tips

- Always warm up before stretching
- Hydrate aggressively
- Use lift footrests whenever possible
- Light cardio on rest days improves recovery
- Boot fit and ankle mobility matter more than you think
